

Smart \$aver® promotes the use of high-efficiency heat pumps, gas furnaces and air-conditioning systems. Over 40,000 Duke Energy customers have already installed Smart \$aver systems – achieving greater comfort and lower energy costs.

Smart \$aver Benefits

If you are purchasing a new heating or cooling system for your existing or new home this is your opportunity to invest in a high-efficiency heating and cooling system and save hundreds of dollars every year!

- Experience greater comfort in your home.
- Help reduce our nation's electric demand, decrease pollution and save energy resources.
- Receive rebates for your new high-efficiency heating or air-conditioning system.

Qualifying Equipment	Customer Rebates
Heat Pumps: must be 14 SEER or greater and include an ECM fan motor	\$200
Gas Furnaces: must be a 90% AFUE or greater	\$200
Air Conditioners 14 SEER or greater include an ECM fan motor	\$200

The Smart \$aver Program described above is available to Duke Energy residential customers in Ohio only. Other states served by Duke energy may have similar program offerings.

Qualifying systems must be installed on or after July 16, 2007.

Duke Energy customers receiving their natural gas service from Duke Energy must also receive their electric service from Duke Energy to be eligible for gas furnace incentives.

Rebates are paid per qualifying unit. For new homes, rebates are paid to the builder unless the builder agrees that the customer will receive the rebate. Other requirements apply. Call toll free at 1-866-785-6209 if you have questions.

Note: Duke Energy reserves the right to change the Smart \$aver program requirements and incentives at any time.
